Methane removal from ventilation air on a copper oxide catalyst

Publication date:	12.02.2025
Publication title:	Methane removal from ventilation air on a copper oxide catalyst
Authors:	Mateusz Korpyś
Journal information:	Chemical and Process Engineering: New Frontiers

The work concerned the preparation of catalytically active copper oxides by electrochemical oxidation. The obtained catalysts were tested for the oxidation of methane with a concentration below 1% vol. in the air.
