Operational Programme Innovative Economy

(UDA-POIG.01.03.02-24-044/11-00)

Duration: 2013 - 2015

Description

The Project No UDA-POIG.01.03.02-24-044/11-00: "International patent protection for the priority of Poland's Patent application P-394701 entitled: "Method for utilization of low-concentration gas mixtures of combustible gas and air with stable heat energy recovery and flow reversal device for implementation of the method"" is to be realised from 2013 to 2015 within the Operational Programme Innovative Economy, Priority, Modern technologies research and development Action 1.3: Support for R&D projects realised by research units on behalf of entrepreneurs, Sub-action 1.3.2 Support for protection of industrial intellectual property created in the research units as a result of R&D studies.

Objectives

Within the framework of the Project an invention recently developed in the Institute and already applied for domestic patent protection is to be extended for chosen foreign countries which could possibly be interested in industrial application of coal mine ventilation air utilization technology. The forecasted extension will contain USA, Canada, Australia, China, Russia and Ukraine.
